DETAILED ACTION

Drawings

1. The drawings are objected to because figure 4 has 2-6s and the 6 near #4 does not appear to be directed to the same element as the other 6. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Exemplary of such:

Claim 1, line 5, the 'means' is lacking a 'for' statement;

Line 5, it is unclear as to what is meant by 'associated with'; is it connected thereto?

Line 7, to what is the other end of the passage means leading to?

Claims 2-4, line 1, 'A' should be replaced with 'The'.

Claim 4, line 2, it is unclear as to what is meant by 'associated with'; is it connected thereto?

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Carsey.

Carsey discloses a plurality of individual enclosures enclosing working areas (fig. 2, #33, col. 2, line 55).

Carsey discloses a common enclosure arranged around the individual enclosures (fig. 2, area defined between #3,4).

Carsey discloses a means for creating a negative pressure in the common enclosure (fig. 2, #26).

Carsey discloses a passage means associated with each individual enclosure (fig. 2, #32).

With respect to claims 2-3, Carsey discloses a space located on several sides between the common enclosure and the individual enclosures (fig. 2).

With respect to claim 4, Carsey discloses at least one passage associated with each individual enclosure and each of the passages merging into a common passage (fig. 2, #32,25).

Art Unit: 1744

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Strong, Sutton et al, Bechtler, Becker and Rhea et al. disclose dust withdrawing arrangements having a common enclosure surrounding a plurality of work areas.
